

Welcome to the Eye Department at the Royal Hallamshire Hospital

MAIN CLINIC RECEPTION

Please give your letter in to
the Eye Clinic Reception...

..or to the Orthoptic Reception.

You will need to have your eyes tested...

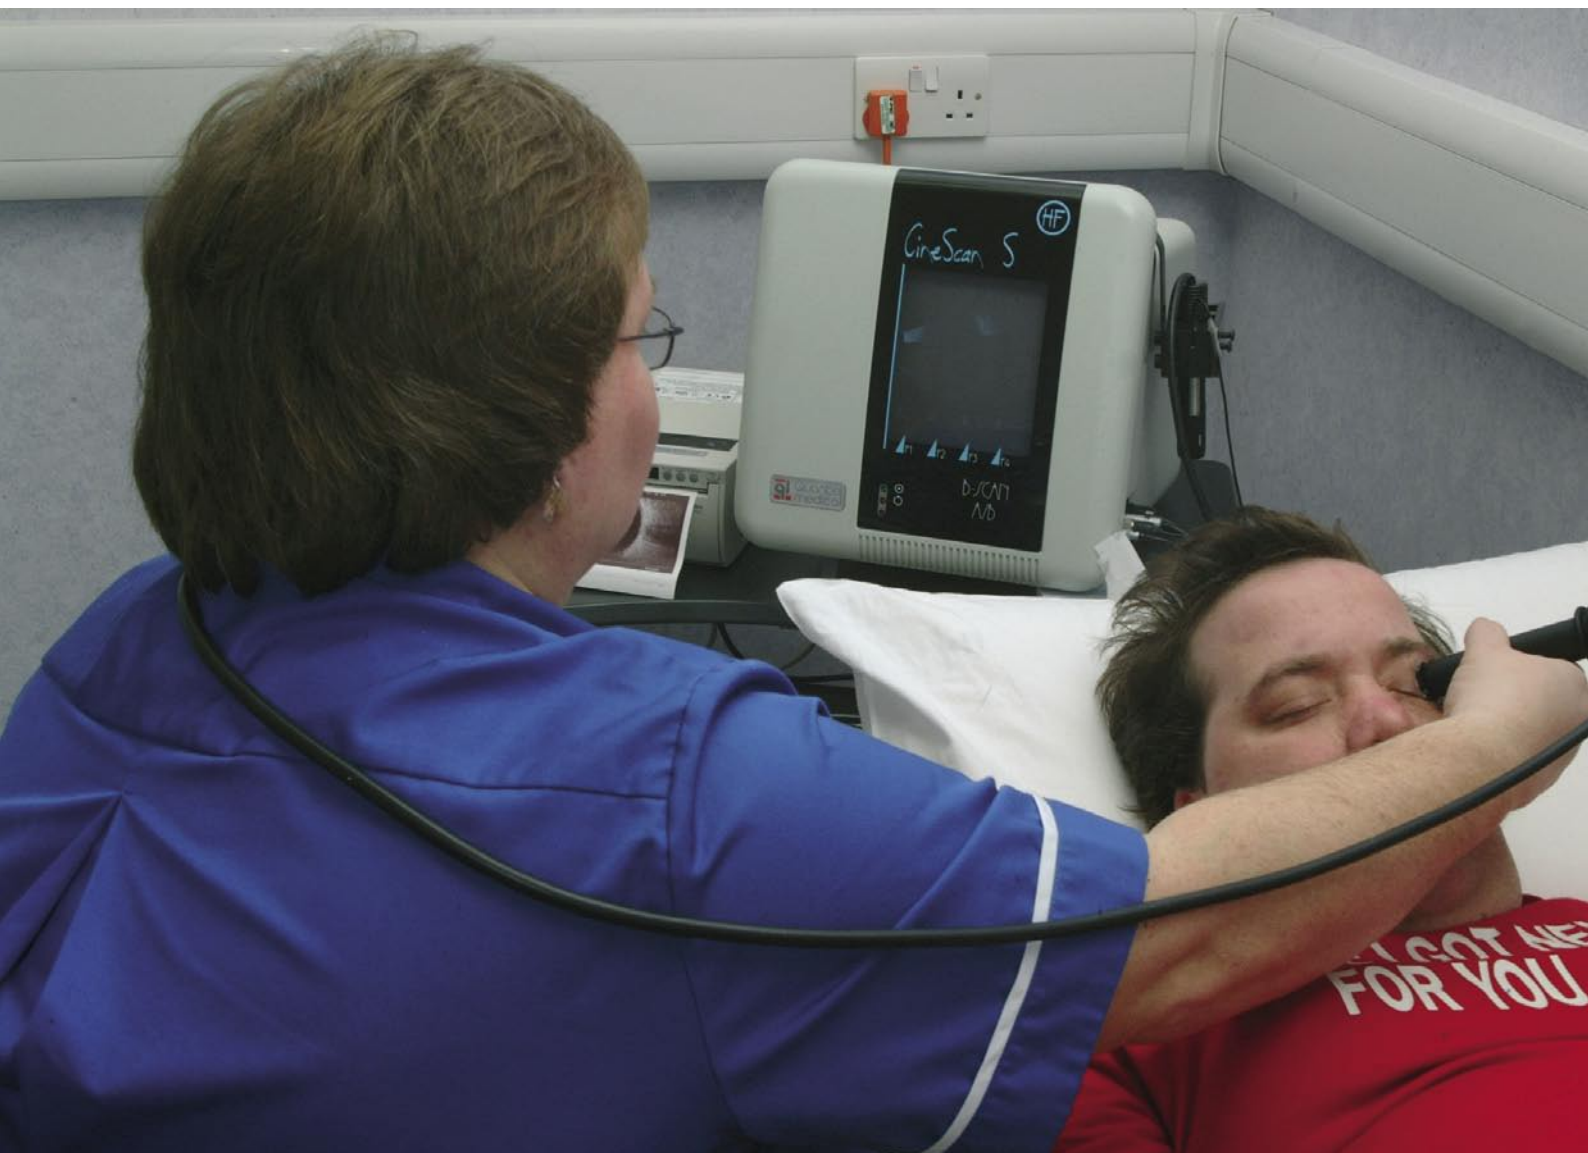

...and may need to have eye drops.

This is a special machine called a slit lamp, which shines a beam of light onto your eye.

It does not hurt.

The doctor will then talk to you about your eyes.

These are some other things you might see...

This ultrasound machine takes a picture of the inside of your eye. It does not hurt.

This topography machine
measures the front of your eye..
It does not hurt.

This electrodiagnostic test
measures activity between your
eyes and your brain.

It does not hurt.

You may need to have a photograph taken of your eye. It does not hurt.

For further information or
discussion please contact:

Staff Nurse Catherine Hardwick
Learning disabilities link nurse

or

Karen Dolling
Support nurse for the visually impaired.
